Team Name: sdmay24-07
Team Members:
Abdelrahman Mohamed, Anirudh Ambore, Evan Hanson,
Mishari Alharbi, Wonjun Choi, Ziyad Alqahtani
Report Period: Nov 12-19

===
Summary of Progress in this Period
===

> During this period, our team was able to create a working model that can analyze an image and report the percentage of chance for it to be cancerous. We developed more of our server-side work in AWS and will be starting to determine how to run our model using AWS in the up and upcoming weeks.

===
Pending Issues
===

- Porting model to the cloud.
- Logic missing from webpage.
- Running model with accuracy in mind.
- Finalize our senior design website by uploading the design and report documents.
- Getting ready for the final presentation.

===
Plans for Upcoming Reporting Period
===

- Organizing and adding all the related files to the team website.
- Get two separate models working
- Update our SD website
- Prepare and practice for the final presentation
